Hello Christian,

Yes, it is fine to change my contribution from LGPLv3 to BSD 3-clause.

Thanks,

Hi Gijs and Chris,

both of you have contributed to our package [pilz_trajectory_generation](#). We want to [merge it into the moveit codebase](#). Therefore, we have to change the license **from LGPLv3 to BSD 3-clause** to match the licensing of the remaining moveit repo. Both of you have contributed (Gijs: [b1071a6ea5682a9c517e48c49ff7d45da76ed122](#) and [bf32e935ee3b705a075434305696566c251d3703](#), Chris: [4dc4972a2cbafcf2fa8cb4966a96414a6403913](#)) to the package. That is why I have to ask you for your consent in making the license change.

Can you **please answer the E-Mail, agreeing with this change**. I will then make a copy of the E-Mails and add them to the repo somewhere.

Thanks in advance
Christian
